Timing belt drive.

Front tucks are improved and air driven for long tuck life.

Air adjustable pressure rolls.

Product control wheels maintain the position

Eccentric hand levers make pressure roll

Hand knob for nip height adjustment.

of the case through the front tucks and into the side fold section.

removal simple and effortless.

RSN Crimping Tucks produce quality corners even when tucking tough materials such as bonded leather.

In the far right picture, note how the bonded leather is tucked into position, ready for the final fold.
